SUMMARY

Full Stack Software Engineer with experience building scalable **web and mobile applications using TypeScript, ReactJS, React Native, Next.js, Node.js, Java, Spring Boot, GraphQL, and AWS**. Skilled in **backend development, REST/GraphQL APIs, distributed systems, microservices, PostgreSQL, Redis, CI/CD pipelines, Docker, Jenkins, and cloud-native deployment**. Experienced in **performance optimization, caching, monitoring, testing, authentication/security, and scalable system design** with hands-on exposure to **frontend-backend integration, DevOps, and mobile-first architectures**.

TECHNICAL SKILLS

- Languages:** JavaScript, TypeScript, Golang, Python, Java, C, C++, SQL
- Backend & Web Technologies:** ReactJS, React Native, Next.js, Express.js, Vite, Capacitor, Node.js, GraphQL, Spring Boot, Django, HTML, CSS
- Architecture & Design:** Microservices Architecture, RESTful Systems, Distributed Systems, MVC Pattern, Component-Based Architecture, Cross-Platform Architecture
- Testing & Quality:** Unit Testing (JUnit, Mockito), Integration Testing, Selenium, QA, Test Automation, Performance Optimization, Caching & Debouncing
- Tools & AI:** Git, GitHub Actions, Docker, Jenkins, Kubernetes, Terraform, AWS (EC2, S3, Lambda, API Gateway), Redis, Postman, Grafana, Linux, CI/CD Pipelines, Microservices Deployment, YouTube Data API v3, Media Session API, Claude AI, Google Gemini, Copilot, Antigravity, AI-Assisted Development
- Problem Solving:** Data Structures & Algorithms (LeetCode 150+), Object-Oriented Design, Low-Level Design (LLD), High-Level System Design (HLD), Distributed Systems

EXPERIENCE

- Software Engineer** Jul 2025 – Present
BNS Inc.
- Built scalable customer-facing applications using **React, Java, Node.js, TypeScript, GraphQL, Go, and AWS**, improving overall system performance by 30%.
 - Optimized **REST APIs** handling 10K+ requests/day using **Redis caching**, optimized **PostgreSQL** queries, and debugged, diagnosed, and resolved production issues using logs, monitoring, and metrics, improving system reliability and reducing latency/downtime by 25%
 - Contributed deployment automation to **CI/CD pipelines (Docker, Jenkins)** and microservices architecture, improving deployment speed by 40% including writing **integration tests** and performing **QA** before releases.
- Software Developer - Web** Jun 2024 – Aug 2024
WoMen of Connections Ministry
- Developed and improved transaction workflows and performance using **React, JavaScript/TypeScript, Python**, reducing bounce rate by 15% with mobile-responsive design.
 - Collaborated with cross-functional teams and stakeholders to deliver and integrate features using **AWS services & CI/CD pipelines**, improving delivery efficiency.
- Software Developer** Aug 2022 – Oct 2023
Odico A/S
- Assisted in implementing **Infrastructure as Code** using **Terraform and AWS** to provision cloud resources (compute, storage, networking), reducing manual provisioning effort by 70% and improving deployment consistency.
 - Configured monitoring and logging pipelines (**CloudWatch/ELK-style stack, Grafana**) with alerting, enabling 30% faster incident detection and resolution across microservices.
 - Supported implementation of secure access controls and **secrets management (IAM roles, environment isolation)**, reducing security risks and aligning with compliance best practices.
- Software Engineer** Jan 2022 – Aug 2022
Rakuten International
- Contributed to back-end services from design to deployment, including monitoring and performance tuning, developing scalable backend systems and **RESTful APIs** using **Spring Boot, Java, SQL, distributed processing**, improving throughput by 2x.
 - Achieved 85% test coverage using **JUnit, Mockito**, enhancing reliability and reducing production issues.
 - Automated deployments and monitoring using **Jenkins, ELK, Grafana**, reducing incident response time by 40%.

PROJECTS

- Resonance | [GitHub Link](#) | [Play Store](#) | [App Store](#)** *ReactJS, Capacitor, Django, REST Framework, Claude, Copilot, Antigravity*
- Developed an **AI-assisted cross-platform music streaming application** using **React, Vite, Capacitor, Django REST APIs, and YouTube Data API v3 with Claude and Gemini-assisted development**.
 - Built scalable playback features including **JWT authentication, synchronized lyrics, smart queue management, cached/debounced search, and playlist persistence**.
 - Created 12+ reusable **frontend/backend modules** supporting **artist discovery, playlists, authentication, and Android deployment workflows**.
- Secure File Storage System | [GitHub Link](#)** *Spring Boot, AngularJS, Python, SQL*
- Built a full-stack application using **Angular, Spring Boot, and SQL with scalable REST/GraphQL APIs**.
 - Implemented end-to-end encryption (**AES**) and secure file transfer using **HTTPS**, ensuring data confidentiality and reliability.
 - Designed **RBAC authentication and secure key management** improving **system security and resilience**.
- Reddit Clone (Spring) | [GitHub Link](#)** *React, Spring Boot, SQL, Docker, Jenkins, AWS*
- Built a customer-oriented full-stack application using **React, Spring Boot, SQL**, designing scalable **REST APIs** and backend services.
 - Implemented **authentication, CI/CD pipelines, Docker, Jenkins, and AWS EC2 deployment** for production-ready architecture.
 - Improved system performance using concurrent processing and optimized data handling, achieving 2x performance improvement.

EDUCATION

- George Mason University** Fairfax, VA
M.S. in Computer Science Aug 2023 – May 2025
- Coursework:** Artificial Intelligence, Machine Learning, Software Architecture & Design, Cloud Computing (AWS), Database Systems, Advanced Algorithms
- Amrita Vishwa Vidyapeetham** Kollam, KL
B.Tech in Computer Science June 2018 – August 2022
- Coursework:** DSA, Object-Oriented Programming, OS, Computer Networks, Database Management Systems, Machine Learning, Distributed Systems, Software Engineering, Computer Organization & Architecture

CERTIFICATION

- AWS Certified Cloud Practitioner** 2025
- Earned **AWS Certified Cloud Practitioner**, demonstrating a strong understanding of **cloud architecture, security, pricing models**, and **core services (EC2, S3, Lambda)**, and applied knowledge to design **scalable cloud-based solutions**.
